DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 21-24, drawn to a method of verifying contents of a package comprising a spectral image of a first package having a plurality of receptacles for receiving an item, wherein the plurality of the first package receptacles of the spectral image do not contained any items, and a spectral image of a second package for containing an item in a plurality of receptacles of the second package, comparing the spectral image of the first package with the spectral image of the second package, classified in class 356, subclass 394.
 - II. Claims 17-20, drawn to a push broom scanning imaging spectrometer comprising an imager for acquiring a line of image pixels of a moving package, wherein the image pixel line comprising a plurality of contiguous spectral bands and is oriented perpendicular to the direction of motion of the package, a conveyer system for moving the package through a field of view corresponding to the imager, and a processor for being programmed to compare the line image pixel with a reference signal, classified in class 356, subclass 237.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another

Art. Unit: 2877

materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as using interferometer, spectrographic, spectrophotometer, and optical photometers.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Vraig A. Neugeboren on 05/29/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art.Unit: 2877

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Sang Nguyen whose telephone number is (703) 308-6426.
